

**CRESCENT**

Your course will begin at Crescent Suzuki Performance Centre at Verwood. This is the home of Rizla Suzuki BSB and Moto GP race teams and is a truly great motorcycling environment in which to start your course. You may even get to see some of the current team!

The basis of any course will be determined on an initial road ride in order to determine your level of riding. This will enable us to ensure that your course is tailored to your style of riding.

You will then receive a presentation on various sections of the System of Rider Training at the Verwood HQ. This will be followed by road riding to our off road training area in nearby Blandford for some low speed manoeuvring, counter steering and advanced braking exercises.

Returning to the road will include demonstration rides by the instructor along with Police style commentary riding. Roadside debriefings and the use of on board cameras will all ensure that you gain the maximum from your road time. The tuition will be both exiting and hard work along with a great deal of fun – an experience which will totally transform your riding.

The training includes instruction on all aspects of advanced motorcycling, including how to read and gain information on the road ahead. The correct position and speed on bends, overtaking techniques, wet weather riding (optional), night riding (long course) and finally, making good safe progress.

On completion of your course you will receive a Certificate which will reduce your insurance, along with a report grading you on your standard of riding. Part of the Enhanced Rider Scheme.

# Performance RIDER TRAINING

*Learn the skills  
of road riding*

BROUGHT TO YOU BY

# An Advanced Training Course *with a difference!*

Being aimed directly at the sports bike rider of today, Mike Nelson, course designer and instructor, ensures the training is tailored to suit an individual's needs.

The course is designed to be 90% practical with the majority of the training taking place on the open road. The instruction is **one-to-one**, allowing you to receive maximum benefit. However, if you wish to train with a partner or friends, then providing you are of a similar level and experience, with a comparable motorcycle, this will also be possible.

You will be equipped with a high quality intercom system, provided by Autocom, for the duration of the course, and a detailed roadside debrief will take place, which will be aided by footage taken from the instructor's helmet camera.

The system used for this course is that which is used by the UK Police. It has proved, over the years, to produce some of the best and most skilful riders on the road. Mike has chosen to integrate it in the Advanced Training to allow you to gain the best from both your machine and yourself, enabling you to ride with confidence and in a progressive and skilful manner. This should dispense with Sunday ride out 'near misses', or even worse, an accident.

Mike is an experienced ex Military Police Motorcycle Instructor and has vast experience and knowledge of riding motorcycles all over the world.

“ I believe that this course will be a major step forward in Advanced Riding. Today's riders require the skill, knowledge and training which is now available in this package. Mike has designed this course, incorporating his years of experience and knowledge of all aspects of on road riding, with the intention of reducing accidents and increasing enjoyment. An opportunity to enhance your skills in a truly unique training environment. ”

### John Reynolds

Having retired from a successful racing career, winning 3 Superbike Championships, John is now Suzuki's Performance Ambassador and also promotes the road safety awareness campaign *THINK!*

Progress your skills and have fun!

### ATTENTION BIKERS

*No previous Advanced Training is necessary to enrol on this course*

Students who have completed the one day Bikesafe course will receive a discount on production of their proof of attendance.

Whether you want a 1 day course, or a 4 day course with the option to overnight, Mike can arrange it.

Relaxed, biking environment

*Drinks and sweet snacks are available whilst on site*  
(It is advisable to bring a packed lunch)

Pre-ride Presentations

*You'll see yourself in action during the roadside debriefs*

Safety comes first

“ I have been responsible for training and working alongside many of the most professional specialist motorcyclists within the Police and HM Forces. You will receive the highest personal standard of training, and I will be on hand to pass on the skills and knowledge to make you an effective and safe rider. This will be a unique opportunity to receive training which, up until now, has been available for the privileged few. ”

*Mike Nelson*
